

YOUR TRUSTED BREED

making it happen

**Maine Drilling
& Blasting**

October 8, 2019

Dear Property Owner/Tenant:

We at Maine Drilling & Blasting would like to take this opportunity to introduce you to our company and advise you that we have been selected to conduct a rock drilling and blasting operation in your neighborhood.

We would like to offer you a pre-blast survey of your building, at no cost to you. If you would like to have a pre-blast survey, please contact us at (800) 422-4927 Ext.1521 as soon as possible.

The jobsite will be well marked with highly visible signs that detail the whistle warning sequence that will be sounded prior to initiation of each blast. All blasting operations will be conducted during daylight hours and no explosives will be stored on the construction site overnight.

If you happen to be in the building during the blast, you may experience low levels of ground vibration. We will strive to minimize the amplitude of the blast and will be utilizing the most advanced technologies available to the blasting industry to measure the seismic effect to your area. Please be assured that the ground vibrations associated with the blasting will not exceed the established limits that could potentially cause damage.

If you have any questions or concerns I encourage you to contact me at my Bethel, PA office (800) 422-4927 Extension 1521, from the hours of 8:00 AM to 4:00 PM and I will respond to your concerns in a timely manner.

Sincerely,

Kristian Bills
Safety Engineer
