

[DATE]

Dear Customer:

At PECO, we are committed to providing safe and reliable energy for our customers and the communities we serve. As part of our work, we will be upgrading and installing new equipment to enhance the local electric distribution system in your area.

This project is part of PECO's Reliability & Resiliency Plan to invest \$1.36 billion through 2025 on targeted reliability-focused infrastructure investments. These accelerated investments will help strengthen the local electric infrastructure to better withstand more frequent and damaging storms, deliver enhanced reliability for our customers, and enable the adoption of clean energy resources. This plan is part of the company's overall system investment of approximately \$6 billion during the next five years across our electric and natural gas systems to inspect equipment, complete targeted system enhancements and corrective maintenance, invest in new equipment, and perform vegetation management.

About the Project:

- More than \$1 million will be invested to enhance the local electric distribution system for you and your neighbors.
- The majority of this work will occur along area streets, sidewalks and along rear property lines of streets listed; Aronimink Drive, Butler Drive, Caley Road, Goshen Road, Horton Road, Hunt Club Lane, Lewis Road, Malin Road, Mansion Road, Newtown Street Road, Overbrook Drive, Sawmill Road, Tyson Road, Wedgewood Dr, Winding Way Road and Woodview Road.
- New aerial devices called reclosers will be installed. When a problem occurs, like a fallen tree limb, lightning strike or vehicle accident, the recloser stops the flow of electricity on the line and automatically restores electricity where possible.
- Work will include replacement of cables, poles and transformers where necessary.
- Work will typically occur from 7 a.m. to 5 p.m., Monday through Friday.
- Construction will begin in late June 2021 and the project is expected to be completed in early 2022. Work will be performed by a qualified PECO contractor.

Crews may need to temporarily interrupt service to safely complete some of this work. We will work with residents to ensure they are informed in advance of our activities and any planned interruptions. We will work closely with local officials to minimize the impact on traffic and pedestrians whenever possible. Access for services such as trash removal, student transportation and emergency vehicles will be maintained during construction.

We are dedicated to keeping you informed about our work, listening to your input and modifying plans based on your feedback when possible. If you have any questions about work during construction, please contact Dan Abbonizio at daniel.abbonizio@exeloncorp.com.

Sincerely,

William Patterer,
Director, Regional Electric Operations, PECO
